Date of Birth : 02/10/2006

SKILLS & TECHNOLOGIES

Languages :
TypeScript, Python, C# (.NET 10), SQL, Dart, Java, HTML / CSS

Frameworks & Backend :
Node.js, Docker, React / Next.js, Prisma, Ollama (LLM), FFmpeg

Data & Persistence :
PostgreSQL, MongoDB, Redis, Neo4j, MariaDB

Methodologies & DevOps :
MVC Architecture & Clean Code, REST APIs, CI/CD & Git / GitHub Actions, OAuth / JWT Auth

LANGUAGES

French	**Native**
English	**B2**
German	**A2**

CERTIFICATIONS & OTHER

- Driving licence (B)
- PSC1 First Aid Certificate
- BAFA Youth Leader Certificate

PROFESSIONAL PROFILE

3rd-year Computer Science student at IUT de Calais (Associate Degree / DUT validated, Certified Technician level). Specialized in full-stack software architecture, sovereign AI integration (local LLM Ollama), and modern polyglot persistence. Seeking a 14-to-16 week internship starting March 1st, 2027, open to post-internship permanent (CDI) or Master's work-study opportunities.

EDUCATION

IUT de Calais 2024 – Present
Bachelor of Science in Computer Science (BUT) – 3rd Year
- Technician Degree Validated (DUT in Computer Science / 120 ECTS credits)
- Track: Application Design, Development, Analysis and Validation
- Key Projects: NaturSQL (AI Text-to-SQL with LLM), Store map routing (graph algorithms), Astrophoto (OpenCV)

Lycée Albert Châtelet 2021 – 2024
General Baccalaureate
- Majors: Mathematics, Computer Science (NSI), Engineering Science (SI)
- Options: Advanced Mathematics & Cinema-Audiovisual

PROFESSIONAL EXPERIENCE

Fullstack SaaS Developer Intern (BUT 2) April 27 – June 20, 2026 (8 wks)
Théodore Vaunois (Solo Venture) – Remote & IUT
- Specified and developed an automated video pipeline (FFmpeg, 9:16): reduced video editing time by 80%.
- Analyzed and integrated AI features: AutoCut silence detection, automatic subtitles, and translation via Mistral API.
- Result: deployed a production-ready SaaS platform on VPS with Stripe subscription billing and Google OAuth.

Camp Counselor & Activity Leader (BAFA) Summer Seasons (July – August)
Youth Holiday Centers & Summer Camps
- Organized and facilitated daily activities for groups of 20+ youth with full autonomy.
- Team leadership, active communication, and strict adherence to safety standards.

PROJECTS & OPEN SOURCE (GITHUB)

NaturSQL (Smart AI App) **Python / LLM / Docker**

Analyzed and implemented natural language to SQL translation using local LLM (Ollama), Docker, and Python. Top contributor. Result: intuitive database queries without SQL. → Repository

Project 206 SaaS (Private repo) **Fullstack SaaS**

Designed and specified video SaaS architecture (9:16 FFmpeg rendering, Mistral AI API, Stripe, Google OAuth). Result: streamlined video production pipeline.

PixelHub (Polyglot Persistence) **C# .NET 10 / NoSQL**

Polyglot backend architecture in C# .NET 10 combining 4 database paradigms (PostgreSQL, MongoDB, Redis, Neo4j) and Docker. Result: scalable multi-model persistence platform. → Repository
